[Oracle Forms Passing Parameters To A 'DEFAULT WHERE' Clause](#)

Form Personalizations (Purchase Orders)

Function Name: PO_POXP0EPO Form Name: POXP0EPO Custom Mode: Off

Seq	Description	Level	Enabled
	Enter a free text description of the extension here. Upto 100 Personalization can be entered for a given form/function	Form	<input checked="" type="checkbox"/>
		Function	<input type="checkbox"/>

Click here to capture the ACTIONS that you wish to take when this EVENT is fired and your CONDITION has been met

Personalization can either be applied to all the Functions using that FORM OR Just that "FORM FUNCTION" which was selected using Menu

Trigger Event: WHEN-NEW-FORM-INSTANCE
Same set of events can be trapped here, as that for CUSTOM.pll Hence use "Show Custom Events" from Help menu to see the applicable triggers for your extensions

Condition: Condition under which this Forms Personalization takes effect. For Syntax, use the text after a WHERE CLAUSE. If this expression returns FALSE, then all the actions will be skipped

```
SELECT 'x' FROM dual WHERE :PO_HEADERS.VENDOR_NAME = 'IBM' and fnd_profile.value('XX_PO_RESTRICT_AGENT') = 'Y'
```

Processing Mode: Not in Enter-Query Mode

Context: Specify the context if you want this specific extension to fire only for a given set of Users OR for a set of responsibilities OR for the combination of the above

Level: Industry, Site, Responsibility, User

Buttons: Insert/Get Extension, Insert Item/Value, Validate, Apply Now

[Oracle Forms Passing Parameters To A 'DEFAULT WHERE' Clause](#)
